

PVM

Personal Vehicle Management

((PVM) contracts are ideal for private individuals who would like the benefit of our professional cost control and access to our national network with no limited to any mileage restriction or vehicle age. All costs are authorised on your behalf and would be recharged back to you. Full driver management services are supported by a National Network of Repairers and tyre providers including mobile units throughout the UK. A driver card which is subject to an annual fee regardless of usage within the agreement is applicable and all repair requests must be booked either online via our on line booking in facility or through our driver management team.

Authorisation is issued to the repairer on your behalf by our maintenance control team who cost control the repair to ensure labour times, parts and all necessary work is authorised, with any unnecessary or overcharged / non required work being rejected (exceptions apply if the repair is safety or emergency related). Repairs are invoiced to you at the cost amount authorised plus an administration charge. (PVM) contracts require a mandatory recharge authority limit from you and payment by debit / credit card within 24 hours of job completion. A Direct Debit Mandate will be held to collect payment within 3 days should debit / credit card payment not be available, any transactions that are in excess of the agreed amount will be referred to you for additional mandatory authorisation. (Out of hours exceptions apply)
